Overview

The expectation from the FCC regarding Rural Call Completion is for Carriers to improve call quality and completion percentage. By eliminating intermediate Carriers and their networks, ANI Networks' Direct Termination Service enables you to offer your end users an industry leading termination service.

Your long distance traffic will carry a higher Class of Service and terminate directly to the OCN holder without multiple transitional stages in a non LCR environment.

ANI Networks' Direct Termination service, coupled with comprehensive reporting features via ARK© web portal will fortify your termination portfolio, increase revenue by improving call completion, and enhance your customers' long distance termination experience.

Our Strategy is Focused on Serving Customers that can Benefit from our Network, our Custom Solutions, and our Premier Support
